Personal Information

Address	Wieselweg 27, 50859 Köln, Germany
Workplace	Institute for Artificial Intelligence in Medicine (IKIM), University Hospital Essen, Girardetstr. 2, 45131 Essen, Germany
Nationality	Canadian
Born	25 October 1994, Vancouver, Canada
Phone	+49 151 28879306 (Germany); +1 (604) 319-3226 (Canada)
Languages	English (native), Cantonese (fluent), Mandarin (conversational), German (beginner)

Research Interests

My research develops federated and privacy-preserving machine learning for trustworthy AI in medicine: methods that let clinical models learn from distributed hospital data without centralizing patient records, with explicit accounting of communication cost, privacy, and reliability. It builds on a PhD in neuroscience in which I applied machine learning to addiction psychiatry, including overdose risk prediction and clinical decision support.

Methods	Federated and continual learning; privacy-preserving and communication-efficient distributed training; deep learning; clinical prediction and risk modelling; natural language processing and large language model tooling; statistical modelling and meta-analysis
Applications	Federated learning for medical data; addiction psychiatry and the overdose crisis; digital and youth mental health; clinical decision support; maritime surveillance; data science education and AI literacy

Academic Appointments

Jul 2026 – Present	**Postdoctoral Researcher**, Institute for Artificial Intelligence in Medicine (IKIM), University Hospital Essen, Germany Jointly supervised by Prof. Jens Kleesiek (IKIM) and Prof. Michael Kamp (Kamp Lab, Lamarr Institute, TU Dortmund). Federated learning for medical data in the FLIP-IT project (NEXT.IN.NRW-funded), with Dr. Moon Kim. See Current Research Projects.
Jul 2024 – Jun 2026	**Postdoctoral Teaching and Learning Fellow**, Master of Data Science (MDS) and Department of Statistics, University of British Columbia Two-year appointment. Primary instructor for 10 data science, statistics, and science courses reaching more than 550 graduate and undergraduate students; capstone supervision; curriculum development; educational research. See Teaching.
Oct 2022 – Jan 2023	**Visiting Researcher**, Brain and Mind Centre (Digital Mental Health Team), University of Sydney, Australia Project: Machine Learning Synergy. Hosts: Prof. Ian Hickie and Dr. Frank Iorfino; home supervisor: Dr. Michael Krausz. Funded by Mitacs Globalink.

Education

Sep 2019 – Apr 2024	**PhD, Neuroscience**, University of British Columbia, Vancouver (fast-track transfer from MSc) Dissertation: *Machine Learning Applications in Addiction Risk Prediction* Supervisor: Dr. Reinhard Michael Krausz. Committee: Dr. Alireza Kazemi, Dr. Raymond Ng, Dr. Christian Schuetz.
2012 – 2017	**Honours BSc, Neuroscience**, University of Toronto Minors: Environmental Science; Religion.

Current Research Projects

Ongoing	**FLIP-IT: federated learning for medical data** (IKIM; NEXT.IN.NRW-funded) Federated Learning in Practice Networks, co-funded by the European Union and North Rhine-Westphalia, builds infrastructure for decentralized training of medical AI across general practices in NRW (consortium: IKIM, docport, Flower Labs, KVWL, KVNO; project lead: Dr. Nico-

las Conze). I build federated chronic kidney disease risk prediction (P(CKD stage ≥ 3)) on the Flower framework, with a privacy design of patient-level DP-SGD and SecAgg+ secure aggregation, FedAvg, an RDP privacy accountant with one global (ε, δ) target and per-practice noise calibration, per-round monitoring of global and worst-practice AUROC and sensitivity, and a governance gate with membership-inference leakage audit and clinical and legal review before on-site deployment. With Prof. Jens Kleesiek, Prof. Michael Kamp, and Dr. Moon Kim. flipit-research.network

Ongoing — **Brain-inspired federated continual learning for healthcare AI**
Privacy-preserving federated continual learning algorithms (federated synaptic consolidation, federated hippocampal replay, predictive-coding federated learning) that let clinical models learn continuously from distributed hospital data without catastrophic forgetting; open-source benchmark toolkit.

In progress — **Activation and rank-code communication protocols for federated learning**
Federated protocols in which clients communicate activation or rank codes (which units fire, and in what order) instead of model parameters, with pre-registered control arms and explicit communication-bitrate accounting.

Publications

13 peer-reviewed journal articles (6 as first author, 1 as corresponding author); 412 citations (Google Scholar, October 2026). **Bold** marks my name; * marks corresponding author.

Peer-Reviewed Journal Articles

17. **Tai, A.M.Y.**, Suen, J., Chopra, G., Westenberg, J.N., Elsner, J., Cabanis, M., Kamel, M.M., Schomerus, G., Bluhm, M., Maremmani, A.G.I., Moghadam, A., Meyer, M., Choi, F., et al. (2022). Personal and educational experiences of medical students on attitudes towards psychiatry. *Research Square*. https://doi.org/10.21203/rs.3.rs-2299344/v1.

Dissertation

18. **Tai, A.M.Y.** (2024). *Machine Learning Applications in Addiction Risk Prediction*. PhD dissertation, Neuroscience, University of British Columbia. hdl.handle.net/2429/87759.

Software

R package	**GGenemy** (CRAN). Automated auditing of ggplot2 visualizations for accessibility, readability, and misleading practices: colour vision deficiency simulation, WCAG 2.1 contrast ratios, detection of truncated axes, small text, missing labels, inadequate point sizes, and colour-only encoding, with automated fix suggestions.
Web app	**Overdose risk classifier** (andytai7-odclassifiers.hf.space). Public deployment of the RAMP overdose risk models; code at github.com/andytai7/ml-overdose-risk-assessment.
Demos	**flower_demo** (federated learning with the Flower framework) and **huggingface_mlclassifier** (github.com/andytai7).

Research Funding

2019 – 2024	**Co-Investigator**, Risk Assessment and Management Platform (RAMP): An online overdose risk score with tailored feedback. Health Canada, Substance Use and Addictions Program. CAD 1,407,790. Built the overdose risk prediction models on the BC Provincial Overdose Cohort (2015–2019; N = 36,679): random forest, XGBoost, and support vector machine classifiers on 48 clinical features, with multi-source record linkage, missing-data handling, and severe class imbalance; 91.1% AUROC for general overdose prediction. Identified opioid agonist therapy as consistently protective and polysubstance use, co-occurring depression, and cardiovascular conditions as risk factors. The classifier is deployed as a public web application (andytai7-odclassifiers.hf.space).

Awards and Honours

2022 – 2023	**Mitacs Globalink Research Award**, CAD 6,000 (stipend and research costs) for visiting research at the University of Sydney
2021 – 2023	**President's Academic Excellence Initiative PhD Award**, University of British Columbia
2021 – 2022	**UBC MDS Teaching Assistant Award**, for teaching contributions across multiple MDS courses
2021	**People's Choice Award (Lightning Talk and ePoster)**, UBC Research Day, for machine learning overdose risk modelling
2019	**Faculty of Medicine Graduate Award**, University of British Columbia
2019	**NIDA Travel Award**, USD 500, for the 2020 NIDA International Forum

Teaching

Primary Instructor, University of British Columbia (2024 – 2026)

Ten graduate (MDS) and undergraduate courses across data science, statistics, and science communication, reaching more than 550 students.

DSCI 100	Statistics and Data Science	DSCI 551	Descriptive Statistics and Probability for Data Science
DSCI 513	Databases and SQL for Data Science	DSCI 591	Capstone Project
DSCI 521	Data Science: Tooling	STAT 302	Introduction to Probability
DSCI 531	Data Visualization I	SCIE 113	Science Communication (first-year seminar)
DSCI 542	Communication and Argumentation	SCIE 300	Science Communication (third-year)

Curriculum Development and Educational Scholarship

- **The Regression Cookbook: Machine Learning and Stats Flavours.** Co-author and curriculum developer of this open textbook funded by the UBC OER Fund. Each method (OLS and GLMs; ridge, lasso, and elastic net; trees and ensembles; structured-data regression) is presented once in both machine learning and statistics idioms, with side-by-side Python and R code, assumptions, diagnostics, and a shared cross-disciplinary glossary. Used in DSCI 551, DSCI 100, and STAT 302. alexrod61.github.io/regression-cookbook
- **AI literacy in higher education (TLEF-funded).** Built the statistical analysis framework using cumulative link mixed models and Stuart-Maxwell tests of marginal homogeneity.
- **Responsible generative AI in data science education.** Designed a GenAI policy lab, collaborative brainstorming activities, critical visualization assessment, and AI-resilient assessment for DSCI 531.
- **Course infrastructure.** PrairieLearn assessment and rubric design across MDS courses; Quarto-based course websites; lecture materials on data visualization (Altair, ggplot2), simulation, and AI literacy.

Teaching Assistant, University of British Columbia (2019 – 2024)

Master of Data Science: DSCI 522, 523, 524, 531, 532, 541, 551, 552, 553, 571, 573. Undergraduate data science: DSCI 320. Business Analytics: BAIT 507, 509, 580A. Computer Science: CPSC 121, 322. Neuroscience: NRSC 501. Recipient of the MDS Teaching Assistant Award (2021–22).

Supervision and Mentorship

Capstone Project Supervision, UBC Master of Data Science (DSCI 591)

Industry-partnered applied projects of 8–10 weeks.

- *Nautical Crime Investigation Services.* **Semi-supervised vessel trajectories.** AIS maritime data (about 20 GB); HMM segmentation, LSTM sequence labelling, and random forests; land filtering, vessel ID triage, trip labelling, and a full evaluation framework. Led to a journal article (*Engineering Applications of Artificial Intelligence*, 2026; corresponding author).
- *BC Children's Hospital.* **CPOE impact evaluation on paediatric laboratory services** (Department of Pathology and Laboratory Medicine; sponsor: Dr. Vilte Barakauskas). Evaluation of computerized provider order entry, ID-band scanning, and electronic ordersets after the February 2022 Cerner go-live; SQL linkage of laboratory information system and EHR extracts within the PHSA PANDA secure enclave; pre- and post-implementation analysis.
- *Vaccine Evaluation Center, BCCHR.* **MedDRA autocoder.** Hybrid retrieval system coding free-text clinical verbatims to MedDRA concepts using biomedical sentence embeddings (SapBERT, BioLORD, BiomedBERT) with lexical re-weighting; Streamlit application with two-stage reviewer adjudication. Top-3 retrieval accuracy of 0.887 on internal evaluation.
- *Creative Destruction Lab.* **Venture dashboard.** Survival analysis (Cox PH), graduation prediction (XGBoost, HistGB), KNN similarity, and GPT-4 feature extraction in a Dockerized Plotly Dash application for early-warning analytics.
- *UBC Cybersecurity.* **Automated phishing detection.** Containerized email classification service with a monitoring dashboard and reproducible deployment.

Capstone presentation evaluator (not supervisor) for projects with Clarius Mobile Health (external demand signals for handheld ultrasound) and VRIFY Technology (deep learning for soil geochemistry prediction).

Student Mentorship

2025 – Present	**Agam Sanghera**, PhD student, Neuroscience: thesis in progress
Jan – Apr 2025	**F. Farouj**, UBC Integrated Sciences (faculty mentor): curriculum and degree planning across data science, computer science, and neuroscience
Jan – Apr 2025	**Venture Founder C49**, Innovation UBC (mentor): strategy coaching for early-stage ventures
Jan – May 2023	**J. Feng** (University of Toronto): telemedicine versus in-person outcomes in mental health

Jan – May 2023	**S. Jain** (Nova Southeastern University): e-health in low- and middle-income countries
Jan – May 2023	**D. Walji and E. Li** (Queen's University): systematic review of overdose comorbidities
Jun – Aug 2022	**X. Kong** (University of Toronto): feasibility of machine learning in Alzheimer's neurodegeneration

Presentations

Jun 2023	**1st Canadian Academy of Addiction Psychiatry Conference**, UBC/BCMHSUS/PHSA. Event coordinator.
Apr 2023	**Let's Talk Overdose: Shortcut to Survival (Youth).** Presenter.
Mar 2023	**3rd Annual BC Concurrent Disorders Conference**, BCMHSUS. Lightning talk: machine learning predictive model for overdose.
Dec 2022	**Translation in Action: Neuropsychiatry to Health Solutions.** Live e-poster: machine learning and overdose risk.
Apr 2022	**Let's Talk Overdose.** Workshops: risk assessment and classification (with Drs. Ng and Kazemi); decision support implementation (with J. Kim).
Jan 2022	**Virtual Solutions for Substance Use.** Workshop: chatbots in substance use care (with J. Kim).
Jun 2021	**Let's Talk Overdose: The Hidden Pandemic.** Workshop: overdose risk factors (with C. Hutton).
Apr 2021	**UBC Psychiatry Research Day.** Poster: machine learning overdose risk (preliminary model).
Mar 2021	**10th Annual E-Mental Health Conference.** Workshop: machine learning risk factors of fatal overdose (with A. Kazemi).
Jan 2021	**High-Risk Substance Use and Overdose Among Youth.** Workshop moderator (three themed blocks).
Dec 2020	**Virtual Solutions for Substance Use Care.** Keynote: machine learning methods and predictive modelling (with A. Kazemi).
Nov 2020	**CAIDA: BC's AI Showcase.** Poster: predictive model for overdose.
Oct 2020	**CAPE Annual Scientific Symposium.** Poster: predictive model for overdose.
Sep 2020	**2nd International Psychiatry Congress**, Tanta, Egypt. Keynote: machine learning in psychiatry and public health.
Jun 2020	**CPDD International Workshop** and **NIDA International Forum.** Poster: review of opioid use disorder treatments for youth.
Feb 2020	**BCCDC GEOOD Conference.** Contributor: public health agenda for geographic overdose contributors.
Jun 2019	**UBC Psychiatry Research Day.** Lightning talk: RAMP.
Jun 2019	**World Congress of Biological Psychiatry.** Contributor: microglial morphology study.
Feb 2019	**Addiction and Concurrent Disorders E-Mental Health Conference.** Posters: AI in fatal overdose prediction; technology access and literacy in concurrent disorders.

Service and Leadership

Sep 2025 – Jun 2026 **Postdoctoral Representative, SEDI Committee**, Department of Statistics, UBC. Equity, diversity, and inclusion initiatives, policy, seminars, and mentorship programs.

2025 – Jun 2026 **Coordinator, EDI Seminar Series**, Department of Statistics, UBC. Speaker invitations and scheduling.

Nov 2025 **Judge**, Science Case Competition 2025 (SCI TEAM, UBC Faculty of Science). Evaluated team strategies for BC wildfire resilience.

Jan – Feb 2025 **Selection Committee Member**, Mastercard Foundation and UBC. Reviewed about 150 scholarship applications.

2024 **Panelist**, National Undergraduate Research Conference (UBC Neuroscience Club; 323 attendees, 41 presentations).

Sep 2021 – Sep 2024 **Associate Editor**, URNCST Journal. Mentored undergraduate research teams across the natural and clinical sciences.

Nov 2019 – Present **Founder and CEO**, Building Blocks, a student-led nonprofit peer-mentoring app and community (corporation no. 1176510-8).

2019 – 2020 **VP Student Life and First-Year Representative**, Neuroscience Graduate Student Association, UBC.

Industry and Consulting Experience

Jul 2025 – Oct 2025 **Data Science Consultant (freelance, part-time)**, Clause Technology
Built HAVA, an agentic system for detecting illegal fishing and maritime criminal behaviour, in collaboration with Nautical Crime Investigation Services (NCIS): automated web scraping, NLP incident classification, and LLM-assisted de-duplication (BERT/NER extraction of vessels, locations, and organizations; fuzzy matching) in a Dockerized, cloud-ready MongoDB/PostgreSQL architecture. Developed a computer vision and OCR pipeline for complex PDF tables (rotations, multi-table pages), including image preprocessing and variable extraction.

Apr 2024 – Present **Analyst**, NAI Innovations, Vancouver
Evaluation of machine learning-driven start-ups in medical cannabis symptom management; algorithmic performance analysis; strategy for AI in neuroscience and psychiatry.

Apr 2024 – Sep 2024 **Data Scientist**, Concussion RX, Vancouver
Machine learning and statistical modelling for concussion subtype analysis; clinical onboarding documentation for the ConcussionRX and Llama 3 toolchain.

Sep 2018 – Dec 2018 **Research Analyst**, NAI Interactive Ltd.
Data mining and research on biotechnology pipelines.

Earlier Research Experience

2018 – 2019 **Research Assistant**, Addiction and Concurrent Disorders Group, Institute of Mental Health, UBC. E-mental health (WalkAlong); RAMP; conference organization.

Nov – Dec 2018	**Research Assistant**, Beasley Lab, BC Children's Hospital Research Institute, UBC. Microglial morphology in bipolar disorder and schizophrenia cortical tissue.
May 2017 – Jun 2018	**Laboratory Technician**, Josselyn Lab, The Hospital for Sick Children (SickKids), Toronto. Epitranscriptomics, optogenetics, operant behaviour, DNA constructs, perfusions, and imaging.
Jan 2016 – May 2017	**Research Assistant**, Mood Disorders Psychopharmacology Unit (McIntyre), Toronto Western Hospital. Big data and machine learning in psychiatry; meta-analysis of THC and cognition; first-author machine learning review.

Professional Development

Jul 2025	**ICML 2025**, Vancouver (attendee)
Sep 2024 – Apr 2025	**Teaching Development Program for New Faculty**, UBC (40–55 hours): reflective practice, learner-centred strategies, Indigenous engagement, inclusive pedagogy
Aug 2024	**Instructional Skills Workshop**, UBC Centre for Teaching, Learning and Technology
Other	IFSE Officers', Partners' and Directors' Course; First Aid and CPR-C; NLS Lifeguard; Naloxone Training

Technical Skills

Programming	Python, R, SQL, JavaScript, React (basic)
Machine learning	PyTorch, TensorFlow, scikit-learn, BERT/transformers, NLP
Federated learning	Flower framework; federated pipeline design; communication-efficient distributed training
LLM tooling	LiteLLM gateway configuration for agentic coding tools; LLM-assisted data pipelines
Data and DevOps	PostgreSQL, MongoDB, Docker, AWS (basics), Git
Statistics	Cumulative link mixed models, Stuart-Maxwell tests, meta-analysis (Covidence), SPSS, SAS (basics)
Teaching tools	PrairieLearn, Quarto, JupyterLab, RStudio, Altair, ggplot2

Community Engagement and Other Activities

Jan – Apr 2025	**Mental Health Ministry Coordinator**, Tenth Church, Vancouver. Monthly seminars; eight-week Sanctuary Course.
2019 – 2023	**CS:GO Director**, UBC Esports.
2019 – 2021	**Member**, Walter Gage Toastmasters.
2019 – 2020	**Volunteer**, Coast Mental Health, Vancouver.
2015 – 2022	**Other employment**: AP Psychology Tutor, UHubor Education (2021–22); Head Coach, Grade 8 Basketball, West Point Grey Academy (2019–20); Lifeguard, Hart House, University of Toronto (2015–17).
2012 – 2018	**Athletics and volunteering**: Varsity Basketball, University of Toronto (2012–14); Right To Play charity all-star game (2018); HELP Program, Toronto Western Hospital (2013–14); ME to We school construction, Kenya (2012).
